Lernen – mitmachen – profitieren

Der ILIAS open source e-Learning e.V. ist die Heimat von ILIAS und das Herz der ILIAS-Community. Seine Mitglieder sichern die Nachhaltigkeit von ILIAS und haben Mitsprache bei der weiteren Entwicklung. Der gemeinnützige Verein verfolgt kein Gewinninteresse, sondern sorgt für die Unabhängigkeit und Transparenz der Software-Entwicklung – damit Sie auch in Zukunft ein modernes, flexibles und lizenzkostenfreies Learning Management System für Ihre E-Learning-Szenarien nutzen können.

Millionen User – ein Verein

ILIAS ist seit 1998 online. Aus einem kleinen Uni-Projekt wurde eine international anerkannte Software-Lösung.

Weltweit gibt es tausende aktive Installationen mit Millionen von Usern. Diese Erfolge sind langfristig nur möglich, wenn die Entwicklung professionell koordiniert wird. Aus diesem Grund existiert seit 2009 der ILIAS-Verein: Er sichert und koordiniert eine nachhaltige und transparente ILIAS-Entwicklung und erfüllt dabei folgende Funktionen:

- Strategische Entwicklung von ILIAS
- Koordination der Software-Entwicklung
- Prozessgestaltung und Qualitätskontrolle
- Organisation von Community-Events wie Entwicklungskonferenzen und die jährliche ILIAS-Konferenz
- Außendarstellung von ILIAS
- Release-Management, Test-Management, Bug-Tracking, Koordination der Dokumentation und Online-Hilfe

Der Verein ermöglicht es Privatpersonen, Institutionen, Unternehmen und Service Providern, sich für ILIAS zu engagieren und die Weiterentwicklung zu sichern. Alle Spenden und Einnahmen fließen in die Vereinsarbeit und in weitere Verbesserungen der Software.

Treten Sie einem starken Netzwerk bei und werden auch Sie Mitglied!

Architecture (Latin *architectura*, from the Greek ἀρχιτέκτων *arkhitekton* "architect", from ἀρχι- "chief" and τέκτων "builder") is both the process and the product of planning, designing, and constructing buildings and other physical structures. Architectural works, in the material form of buildings, are often perceived as cultural symbols and as works of art. Historical civilizations are often identified with their surviving architectural achievements.

"Architecture" can mean:

- A general term to describe buildings and other physical structures.[3]
- The art and science of designing buildings and (some) nonbuilding structures.[3]
- The style of design and method of construction of buildings and other physical structures.[3]
- A unifying or coherent form or structure[4]
- Knowledge of art, science, technology, and humanity.[3]
- The design activity of the architect,[3] from the macro-level (urban design, landscape architecture) to the micro-level (construction details and furniture). The practice of the architect, where architecture means offering or rendering professional services in connection with the design and construction of buildings, or built environments.[5]

Theory of achitecture

The Parthenon, Athens, Greece, "the supreme example among architectural sites." (Fletcher).[6] The earliest surviving written work on the subject of architecture is *De architectura*, by the Roman architect Vitruvius in the early 1st century AD.[7] According to Vitruvius, a good building should satisfy the three principles of *firmitas*, *utilitas*, *venustas*,[8][9] commonly known by the original
